**Forfeited**

For a Maryland entity, its existence has been ended by the State for some delinquency. For a non-Maryland entity it means its authority to do business and legal presence here has been terminated. For a trade name it means the filing has lapsed after 5 years and not been renewed.

**Film**

This entire computer record is merely an index and abstract for the true entity record. The true record is a microfilmed image of the document filed on behalf of the entity. The film number corresponds to a roll of microfilm that contains the image of the document. The folio number is the position of the first page of that document on that film. For example, if the information for Smith INC shows FILM 2337, FOLIO 1198, to view or get a copy of the actual document that created Smith INC, you would get the roll of film numbered 2337 and the 1198th image on that film would be the first page of its articles of incorporation. This system applies to all documents in this record. It is not relevant unless you need to see the actual document filed. This number is needed if you need a certified copy of a document.
